Acetaminophen Metabolism and Hepatotoxicity

Liver Lobule

Notes:

This image represents how the liver lobule model and environment will be colored and shaded.

Acetaminophen Metabolism and Hepatotoxicity

Inside the Hepatocyte

Julia Klein

Notes:

This image represents what the intracellular environment will resemble. Bright colors!

Acetaminophen Metabolism and Hepatotoxicity

Molecular Level - Proteins and Metabolites

Julia Klein

Notes:

This image represents what the intracellular environment will resemble. The bright colors are used again. Since these molecules are basically smaller than the wavelength of light, they can be made in any color I want. Extreme foreground and background objects are out of focus.
